

# **PRACTICAL SKILLS**

- 1. Stretch syndromes eliciting and evaluation (Lasegue's sigh, Wasserman sigh, Mazkewich sigh).**
- 2. Tendon reflexes eliciting and evaluation.**
- 3. Superficial reflexes eliciting and evaluation.**
- 4. Pathological reflexes (corticospinal tract responses) eliciting and evaluation.**
- 5. Range of movement assessment, evaluation of muscle power and muscle tone.**
- 6. Examination of a patient with palsy.**
- 7. Methods of revealing ataxia.**
- 8. Revealing symptoms of basal ganglia lesion.**
- 9. Superficial sensation testing.**
- 10. Deep sensation testing.**
- 11. Higher cortical functions evaluation: examination of gnosis.**
- 12. Higher cortical functions evaluation: examination of praxis.**
- 13. Higher cortical functions evaluation: examination of speech.**
- 14. Meningeal syndrome revealing.**
- 15. Examination of II pair of cranial nerves.**
- 16. Examination of III, IV and VI pairs of cranial nerves.**
- 17. Examination of V pair of cranial nerves.**
- 18. Examination of VII pair of cranial nerves.**
- 19. Examination of IX, X and XII pairs of cranial nerves.**
- 20. Revealing symptoms of median nerve lesion.**
- 21. Revealing symptoms of radial nerve lesion.**
- 22. Revealing symptoms of ulnar nerve lesion.**
- 23. Revealing symptoms of femoral nerve lesion.**
- 24. Revealing symptoms of sciatic nerve lesion.**
- 25. Revealing symptoms of peroneal nerve lesion.**
- 26. Revealing symptoms of tibial nerve lesion.**
